

Increase Revenue From Your Client's Customer Data

CUSTOMER INTELLIGENCE SOLUTIONS:

POWERLINK™

The implementation of a unique key that links identities across channels in a customer centric repository

Enables our clients to understand prior customer behavior and predict the outcome of future interactions

POWERVUE® CRM ANALYTICS

A cloud based, privacy compliant CRM Analytics database deployed in less than 8 weeks using your customer data.

Based upon a simple 4-Step process:

- Selection
- Validation
- Prediction
- Measurement (ROI)

Provides the ability to quickly understand your most valuable customers at the individual (consumer or business) level

A simple way to micro-target offers to discrete groups of customers based on their behavior

Predictive Analytics providing individual based recommendations and offers

Real-time, online, "clear-box" monitoring and validation

Are your clients using what they know about their customers to increase revenue?

- *Improve marketing ROI to drive increased and incremental revenue at less cost*
- *Improve and increase customer acquisition, retention, and cross sell opportunities*
- *Increase overall marketing effectiveness and efficiency with measurable results*

All customers are not created equal. Similarly, all offers are not created equal. Even the best offer can miss the mark and fail to trigger a response from a traditional buyer. A deep understanding of who the best customers are and why they buy adds granular insight into where they come from and more importantly, what motivates them.

At VueLogic, we provide visibility into hidden trends and characteristics from within multiple channels and multiple data stores. This granular level of information further helps to deliver a better customer experience, improve customer service, and transform business operations and strategy ultimately helping your customers get more from theirs.

As a technology pioneer in the Customer Intelligence and Predictive Analytics space, we enable your clients to have intelligent dialogue with their data so that they can understand prior customer behavior and predict the outcome of future interactions.

We leverage a four step process along with patent pending technology to provide a single view of all customer interaction at a detailed and granular level. With deployment in less than 8 weeks and immediate ROI, VueLogic is the clear choice to power your customer intelligence.

VueLogic is a technology pioneer in the Customer Intelligence and Predictive Analytics space. We enable you to understand prior customer behavior and predict the outcome of future interactions, across channels, and in a confidential and secure environment... To increase revenue and decrease cost.
